## **HANDS ON MEDIA LITERACY**

**Project no. 2016-1-PL01-KA201-026422**

*Dissemination in Babite secondary school*

*Riga region*

On May 16, 2018 teacher and Erasmus+ project coordinator Linda Kalnina went to Babite secondary school, one of the biggest schools in Riga region in order to present the international project carried out in Adazi secondary school and share good practices gained through the realization of these projects.

One of the aims for this visit was to talk with students and teachers about Media literacy issues. Since the audience was secondary students of grade 11 and teachers of secondary school Ruta Virbule and Raimonds Jankovskis, it was easy and actually quite obvious to admit that media problems are becoming more and more topical nowadays, especially among youngsters.

The practical workshop about media addictions and dangers was conducted and students were practically involved to express their views alongside with group work- creating lists of most dangerous addictions of the 21st century.

Both sides- guest speaker and host school concluded that it is vital to discuss and learn more about Media literacy issues because this topic is getting more and more significant part of our daily lives. It is of utmost importance to educate society about the dangers of modern media and how manipulative it can be if used wrongly.
